

# Humitest® for bales

**Moisture meter specially designed for measuring moisture in crops packed in high density bales.**

## TECHNICAL FEATURES

|  |                  |
|--|------------------|
| Weight (g) with batteries                    | 150 g            |
| Dimensions (L x l x H in mm)                 | 195 x 100 x 185  |
| Display                                      | LCD              |
| Programmable auto off                        | Yes              |
| Batteries                                    | 2 X 1.5V (AA)    |
| Presentation                                 | Protective pouch |
| Measures moisture between two electrodes     |                  |
| Measures moisture at the centre of materials |                  |

## MOISTURE METER MODE

|             |   |
|-------------|---|
| Calibration | Wheat straw: 9 to 36 % H <sub>2</sub> O |
|-------------|---|

## INCLUDED ACCESSORIES

|                       |
|-----------------------|
| Bales sensor (600 mm) |
|-----------------------|

## WARRANTY AND STANDARDS

|                           |            |
|---------------------------|------------|
| Standards/ certifications | CE marking |
| Warranty                  | 1 year     |

- **Calibrated for measuring water content in straw**
- **Immediate display of readout on LCD screen**
- **Fitted with a biomass sensor**

Equipped with a special probe, this moisture meter measures moisture at the centre of bales of straw and hay.
